

FOR IMMEDIATE RELEASE

TelePresence Technologies, LLC CEO, Duffie White, Named Ernst & Young Entrepreneur of the Year® 2009 Award Finalist in Southwest Area – North

Plano, Texas – June 10, 2009 - TelePresence Technologies, a global leader in the telepresence field, today announced that their CEO, Duffie White, has been selected to be a finalist in the Ernst & Young Entrepreneur of the Year for the Southwest Area North for 2009. Award winners will be announced at a special black tie event on June 27, 2009 at the Majestic Theater in Dallas, Texas.

Mr. White was selected by a panel of independent judges to become a finalist in the multi-state region, including North Texas, Arkansas and Oklahoma. The Ernst & Young Entrepreneur of the Year program is considered to be the most prestigious business award program for entrepreneurs. The finalists are selected for their vision, leadership and achievement in building and leading successful, growing and dynamic businesses.

“As I was developing telepresence technology in the 1990’s, it was challenging to overcome the technical barriers of a new technology” says Duffie White CEO of TelePresence Tech. “However, today we are excited to be recognized as one of the leaders in this dynamic field of “telepresence”. It is gratifying to know that our systems are used in countries around the world to reduce travel costs, minimize environmental impact and improve customer satisfaction.”

White developed an innovative solution to overcome the problem of misaligned eye contact inherent in traditional video conference systems that use flat screens and have exposed cameras placed outside of the image area. His patented technology aligns a hidden camera with the eye level of participants to achieve an astonishing perception of direct eye contact with life-size remote participants from another part of the world. With the TelePresence Tech Room systems the remote participants appear three dimensionally in the room and are displayed full height as they stand and move within the room to engage in natural two-way communication.

About TelePresence Tech, LLC

TelePresence Tech is a global leader in the field of telepresence with their systems installed in 23 countries around the world. The company has a full range of “3D TelePresence” solutions ranging from desktop units to full rooms with an 82” screen. Their patented invention generates a “sense of presence” with aligned eye contact with life-size people superimposed at a physical distance in front of a background.
