### **TelePresence Tech Secures World-Class Manufacturing Partner**

TelePresence Tech, recognized global leader in telepresence, has positioned its company for high volume production capacity by partnering with world-class manufacturing company, Regal Research and Mfg. Co.

This strategic move has been undertaken to meet global demand for TelePresence Tech products resulting from the proven success of its patented technology. The field of telepresence, real time life-size distance communication, was pioneered in the 1990's by Duffie White, CEO of Telepresence Tech. TelePresence Tech systems are currently operating in 17 countries around the world. The field of telepresence is the fastest growing new communications technology with players including Cisco, HP and Polycom.

Michael Powell, Executive Vice President of Regal says "As an equity partner in TelePresence Tech, we are enthusiastic about committing our support to producing high quality products with our precision equipment available in over 225,000 sq. ft. of environmentally controlled manufacturing space and a seasoned, dedicated workforce of 200 employees." Duffie White states "The partnership with Regal Research provides our company with a strong foundation for growth as we undertake larger scale implementations of our telepresence technology."

A Grand Partnership Event is scheduled for Friday, May 9th at their facilities at 1200 E. Plano Parkway in Plano, Texas. Guests will see Telepresence Tech's latest development, the fully immersive 3D TelePresence Room. Live demonstrations will showcase the amazing experience of communicating with people digitally transmitted to appear life-size in the three dimensional setting of the room. This achievement is the culmination of years of development by TelePresence Tech and the world-class manufacturing capabilities of the Regal Research and Mfg. Co.

For further information about the partnership contact Jonathan Varrassi at 866 899 3933 or [info@TelePresenceTech.com](mailto:info@TelePresenceTech.com).
